

## INDICE

<b>RESUMEN</b>	1
Referencias	15
<b>1) INTRODUCTION</b>	17
1.1) Parasitic diseases and general approaches to combatting helminth infections	19
1.2) Background	25
1.2.1) Synthesis of the $\alpha$ -amino- $\delta$ -myristoyloxy- $\epsilon$ -caprolactam nucleus of bengamides	31
1.2.2) Synthesis of (2 <i>R</i> , 3 <i>R</i> , 4 <i>S</i> , 5 <i>R</i> ) trihydroxy-8-methyl-6 <i>E</i> -nonenoic acid side chain of bengamides (SC)	34
1.2.3) Coupling of the $\epsilon$ -caprolactam moiety to the side chain (SC)	38
1.2.4) Anthelmintic assays	39
1.3) Aim of the project	41
References	42
<b>2) SYNTHETIC BACKGROUND</b>	45
2.1) Synthesis of the $\alpha$ -amino-lactam nucleus	47
2.1.1) Ester-amide interconversion methodology	47
2.1.2) Cyclodehydration of $\omega$ -amino acids methodology	49
2.2) Synthesis of the polyhydroxylated acid side chain	49
2.2.1) Julia's methodology	49
2.2.2) Wittig olefination	50
2.3) Condensation of the lactam nucleus to the side chain	50
<b>3) SYNTHETIC STRATEGY</b>	51
3.1) Synthesis of 2-amino-4-hydroxy- $\delta$ -valerolactam derivatives	53
3.2) Synthesis of (2 <i>S</i> , 3 <i>S</i> , 4 <i>R</i> , 5 <i>S</i> ) 3,4,5-tris-( <i>tert</i> -butyldimethylsilyloxy)-2-methoxy-8-methyl-6 <i>E</i> -nonenoic acid	57

3.3) Condensation of the 2-amino-4-hydroxy- $\delta$ -valerolactam derivative with (2 <i>S</i> , 3 <i>S</i> , 4 <i>R</i> , 5 <i>S</i> ) 3,4,5-tris-( <i>tert</i> -butyldimethylsilanyloxy)-2-methoxy-8-methyl-6 <i>E</i> - nonenoic acid	62
References of chapters two and three	63
<b>4) RESULTS</b>	65
4.1) Synthesis of 2-amino-4-hydroxy- $\delta$ -valerolactam derivatives	67
4.2) Synthesis of 2-amino- $\delta$ -valerolactam derivatives	76
4.3) Synthesis of (2 <i>S</i> , 3 <i>S</i> , 4 <i>R</i> , 5 <i>S</i> ) 3,4,5-tris-( <i>tert</i> -butyldimethylsilanyloxy)-2- methoxy-8-methyl-6 <i>E</i> -nonenoic acid	78
4.4) Condensation of the polyhydroxylated acid derivative with the $\delta$ -valerolactam ring	89
4.5) Pharmacology	94
References	101
<b>5) CONCLUSIONS</b>	103
<b>6) EXPERIMENTAL SECTION</b>	107
6.1) General Methods	109
6.2) Chemical Syntheses	109
6.3) Pharmacological Experimental	132
6.3.1) Culture and maintenance of <i>Nippostrongylus brasiliensis</i>	132
6.3.2) Evaluation of anthelmintic activity	132
References	134
<b>7) APPENDIX</b>	135
Compound 3 <sup>1</sup> H-NMR	137
<sup>13</sup> C-NMR	138
Compound 5a <sup>1</sup> H-NMR	139
COSY	141
<sup>13</sup> C-NMR	142

	HMQC	143
Compound 5b	<sup>1</sup> H-NMR	144
	<sup>13</sup> C-NMR	145
Compound 21	<sup>1</sup> H-NMR	148
